DesignWise

Engineering Services

Our fully integrated product design and development team works with your management organization. Together, we explore new markets and products, redesign or modernize existing ones, improve ergonomics, increase maintenance efficiency and work to produce products faster and more profitably.

IT BEGINS WITH A CONCEPT...

DesignWise works with you to develop an individual concept of the project whether it is a new product/idea or a redesign of an existing product.

... FINISHED WITH PRODUCTION

We are capable of taking a project all the way to production of finished units or supply you with a complete documentation package that consists of fabrication/weldment prints, assembly documentation, bills of material, vendor sourcing information, jigs and fixtures as well as manuals for operation, spare parts and maintenance.

LIFTWise

Material Handling

Multiple models of tire handlers, chassis lifters, transporters, fixtures and tools exist in the material handling product line. The capacities of these products range from 500 to 130,000 lbs. and can be customized to meet your specific application. Most material handling concepts are a direct result of an ergonomic, productivity, or safety improvement in the workplace.

Man Baskets

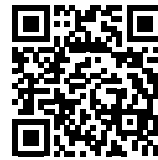

We engineer and manufacture multiple models of man baskets designed for accessing high-reach maintenance areas. The baskets offer quick attachment to service cranes, knuckleboom cranes and boom trucks. They provide a convenient and safe alternative to renting aerial lifts, using ladders or climbing on equipment.

**CUSTOMIZED
MATERIAL HANDLING
SOLUTIONS**

“When I opened Diversified Product Development in 1996, I visualized meeting and exceeding clients’ expectations by creating a unique company that provides fully integrated product design and development.”
